

GLOW PEEL² 30 ml

GLOW PEEL² (with improved formula) is a superficial Glycolic acid and Mandelic acid peel effective in treating hyperpigmentation, age spots, sun damage and dull, tired skin.

Mechanism of Action:

The GLOW PEEL² is a mild superficial Glycolic acid and Mandelic acid peel which will remove the upper layer of epidermis, it stimulates cell renewal, releases melanin from the basal cell layer, provides skin rejuvenation and inhibits melanin synthesis and brightens the skin. It is safe to use on darker skin (skin type: I-VI).

Active ingredients:

- Glycolic Acid (28%) - anti-aging effect, exfoliates the epidermis, promotes epidermolysis, disperses basal layer melanin and stimulates the growth of new skin.
- Mandelic acid (7%) - It has depigmenting properties, inhibits melanin synthesis, exfoliates and rejuvenates skin.
- Kojic Acid (5%) - acts by delaying hyperpigmentation and gives a slight bleaching effect on existing pigmented spots.
- Alpha-Arbutin (3%) - Alpha-Arbutin acts by suppressing melanin tyrosinase activity and thus prevents the synthesis of melanocytes. It works synergistically with kojic acid to enhance the brightening effect.

Suitable for:

- Photo damaged skin
- Hyperpigmentation
- Melasma (darkening of the skin)
- Rough texture, fine lines and wrinkles
- Enlarged pores, dull, sallow skin color
- Ageing skin

Must be mixed with the CLINICARE Peel Blender to perfectly tailor the peel strength and acid pH.
